Canberra Bonsai Society

EMAIL MESSAGE

Dear AABC Clubs.

Could you provide the following update regarding the 2025 AABC Convention to your members, please, via a newsletter or at the next club meeting?

Many thanks

Update

The 2025 AABC Convention in Canberra is filling fast.

On behalf of the Association of Australian Bonsai Clubs (AABC), the Canberra Bonsai

Society will present the convention in Canberra on May 16–19 next year (2025).

The rush has been on to confirm places at the 2025 National Bonsai Convention in May next year.

With 5 months to go, registrations are running well over the 90 per cent mark, and places are going fast. We have a cut-off of 200 registrants.

Registrations can be made online at www.canberrabonsai.club.

Registrations for the masterclasses, critiques and workshops featuring the five national and international demonstrators are nearly all filled.

However, there are still places for Jennifer Price's masterclass (full day) and workshop sessions (half day) for those who act quickly.

Jennifer (pictured below) from Chicago is an internationally acclaimed bonsai artist. She is one of only five professional female bonsai artists in the world. She travels extensively, leading workshops and demonstrations and representing the United States at international conventions.

We recommend viewing one of her most recent workshops at <https://youtu.be/oh3wc-lhQ2U>. As a former professional ballet dancer, Jennifer brings a distinctive eye for natural flow and movement to her bonsai designs. Her workshops provide practical, hands-on experience under expert guidance at all skill levels, from beginners to advanced practitioners.

Here is a testimonial from Jim Osborne (USA). *"Jennifer is the consummate Bonsai professional. She is an awesome teacher, and she never misses a teaching moment. I've attended several of her demonstrations and at least one workshop. If you are lucky enough to attend, whether observing or participating in her workshop, you will come away with increased knowledge of bonsai and whatever material she's working on."*
